Our Ref: UFO Report
14 August 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', on 25 July, which you reported to RAF Coningsby and which was forwarded to this office, which is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives, solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

I am sorry I could not be more helpful.

Yours sincerely

Hi,

As discussed, here is a pic taken by a reader of a 'ufo' over Huddersfield. The pic was taken from a garden at [Section 40] in the Golcar area at about 1.30pm on Sunday, Aug 9.

It shows the view towards the Lockwood area.

Pic one is the original, pic 2 is the same image zoomed in.

Any comment about what the pic shows would be appreciated.

Regards,

Dear Sir

I am writing to report an unidentified object which was visible to the naked eye for seven to eight seconds in the South Eastern sky travelling through cygnus towards castor in cassiopeia before rapidly changing direction by approximately 60 degrees downward towards the horizon with the object gaining velocity significantly. It dissapeared behind the horizon at great speed at almost exactly due East of SS6. The object was a dull brown colour around magnitude 3.5 to 5 and was the size of a small garden pea held at arms length. It resembled a slghtly luminous brown paper bag.

The object must have hit the ground from 1 to maybe 10 miles from the viewing point, although slightly resembling a luminous brown paper bag it did not bounce up again as would be expected from an inflatable object.

The object was definately not a meteor and did not resemble any of the persieds also visible in that area. I have not witnessed such an object before and no sound was heard.

I hope this is useful for your research

Our Ref: UFO Report
11 August 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 8 August 2009 over Northampton, details of which you left on the UFO Hotline. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives, solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

I am sorry I could not be more helpful.

Yours sincerely

Subject: UFO sighting

To whom it may concern,

On Saturday evening at around 9.45pm, whilst at a BBQ with some friends in [Section 40]
Bramhall, Stockport, Cheshire.

We saw a UFO unfortunately we have no footage of it because we were trying to work out what it was.

It looked bright orange as if it was on fire and came over the happy valley at a steady pace before slowing a little when it was adjacent to us, it then gained altitude at a slow pace and disappeared into the clouds.

The whole experience lasted 2-3 minutes and had us baffled. I work on aircraft and couldn't identify what it could be. The size was similar to a hot air balloon, but had no outline or shape.

My name is [Section 40] and there were six of us that saw the UFO, please let me know if you have any ideas.

My mobile is [Section 40]

Regards

Can you deal with this please.

It will need a standard letter, but in the first paragraph you will need to explain that it was forwarded to us by the airport.

I think it is also wish as its going to Northern Ireland to send it in a plain envelope.

Don't send it out until we have discussed on Tuesday.

Subject: UFO advice

Dear Sir/Madam,

Can you help me to find someone who can explain some UFO sightings I have made over the last year?

I have never believed the alien explanation for people's confusion with aerial phenomenon; I've always thought that it was delusional... I have always been a 'flying saucer' sceptic but, however, I am stumped...

I cannot understand what I have been witnessing. I have gone through an elimination list i.e., satellites (too near and/or moving too fast), planet or star (moving too fast), conventional aircraft (no nav or strobe lights even through binoculars), Chinese lantern (too fast), balloon or airship (too fast), low flying conventional aircraft (no nav or strobe lights, no audible sound and it would be obvious through binoculars).

I have seen these things on two occasions. The first occasion was on a clear night about a year ago at approximately 2300 hrs. I stepped outside my front door and while I wasn't actually looking skywards my attention was drawn to a single bright yellow/white light appeared in the west about 30 degrees above the horizon. What drew my attention was its motion. I would describe it as fast and deliberate and apparently silent. It crossed the sky and disappeared over the eastern horizon in about two to three minutes. As it passed overhead it wasn't displaying any characteristics of a conventional aircraft except the fact that it was crossing the sky. Before it disappeared I quickly stepped back inside for my binoculars from the hall stand and I watched through them as it disappeared into the east.

After about five minutes of standing there trying to apply reason to the identity of the 'object' another light, seemingly identical to the first, appeared in the same place, at the same speed and on the same trajectory as the first light. It followed the same pattern as the first light but this time I watched the whole thing through binoculars. The strange thing to me was it looked exactly the same through binoculars - just bigger and brighter. I was expecting a fuselage or wing, nav lights, beacon or strobes, but nothing, just the round yellow/white light travelling at high speed. The light looked no different when it was in the east than in the west. If it were from a conventional light with a reflector I would expect some variation in the intensity of the light depending on the direction from which it was viewed.

The second occasion was about a month ago and exactly the same as the first except this time it was during daylight (approx 0400 hrs), there was broken cumulus cloud and I only saw one light this time. I contacted the Met Office and they told me the cloud in question was between 5000 and 7000 feet so I could establish that it was at least 5000 above the ground as the light disappeared as it passed either through or above the cloud layer.

I am asking you because I don't know where to go. I would like someone to give me an explanation, you know something like: "they were conventional aircraft that are allowed to fly through UK airspace with one bright light and no nav lights and are so small they cannot be seen behind their one big light.

There is more to this but I'll stop at that to save you from becoming bored.

If you or you know someone else who can be of any help I would be really grateful.

My thanks in advance,

Section 40

Subject: UFO in my kitchen?

I would like to report a strange phenomena that i witnessed yesterday though i'm not sure who to report it to. In a sense it was a UFO but not the sort traditionally seen in the sky.

It was about 9.50am, raining outside, dull and grey, quite windy. My kitchen window (a side one, not a top one), by the dining table was open just wide enough for my cat to go in and out, about 6-8 inches.

I walked from my lounge into the kitchen and to my right, a bright white fire ball, about the size of a football flew in through the open window, though it was bigger than the opening so i don't know how it got in through the gap. It landed in a plastic carrier bag that contained loose packets of crisps that was on the table about 1m from the window. It immediately dissapeared but seemed to cause almost blinding white, sheet lightning.

This all took place in the space of about 2 seconds. I cowered and covered my ears as i felt sure there would be a massive crack of thunder but there was not. I went over to the bag to see if there was any evidence such as scorching, melting, smoke, fire, heat etc but there was nothing.

Feeling quite shocked and disturbed i sat down in the lounge for a few minutes and thought about phoning my husband but didn't because i knew he would be driving so i phoned my son instead but he had left his phone at home, i could hear it vibrating upstairs.

I went back into the kitchen and examined the bag once again, in disbelief, but still no evidence, but i am absolutely sure that i did see this strange flying object followd by lightning.

My name is **Section 40**
Address **Section 40** Poole, Dorset **Section 40** (MOD housing)
Telephone: **Section 40**
Mobile **Section 40**
Time and date of sighting: 09.00hrs Tuesday 4th August 2009
Age: **Section 40**
Occupation: Lead Teaching Assistant Secondary School
State of mind: normal as far as i know
I have not witnessed or reported anything like this before.

Please would you let me know your thoughts on this and if i should report it elsewhere.

Thank you

I believe that you are the people to contact regarding the sighting of an UFO.

Last night at approximately 2245hrs we were returning home when my wife was driving we saw in the sky, low in the sky 2 yellow lights one above the other. My wife thought that it was a brightly lit helicopter, but as she was driving I had clearer view as I was able to bend down to see through the windscreen, and saw the 2 lights. They were moving slowly to our right (eastwards). We arrived home some 5 minutes later and after getting out of the car continued to watch them as they moved away slowly towards the moon in the south east of our home and then disappeared behind a narrow cloud bank not to be seen again.

We offer this information to you and we can be contacted on this e-mail address or [Section 40]

I am writing with reference to your report of an 'unidentified flying object', seen on 7 August 2009 over Ullswater, details of which you emailed to the Department. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives, solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

I am sorry I could not be more helpful.

Yours sincerely

Subject: Report of UFO's at Glenridding over Lake Ullswater, Lake District.

Dear Sir / Madam,

Tonight at approx 22.00 hrs I saw what I can only describe as 6 "balloons of fire" over lake Ullswater in the Lake District. The people staying in the holiday cottage next door also came out of their house to see. These UFOs moved at different speeds to each other and in different directions before 'burning out'.

I thought I would report the sighting in case others did the same. If you hear of anything I would be grateful to know what you discover.

Regards

Subject: sighting

I am e-mailing after finding your address on the internet.

Last night at around 10.30pm my husband and I watched in the sky 9 bright orange circular shapes glide across the night sky. They seemed to be travelling at a speed similar to that of an aircraft. At first I thought it was an aeroplane with a different coloured light (we live on a flight path for Manchester Airport), but then one after the other more and more lights came into view. Then I thought it was fireworks, but they don't last that long, and don't move like these lights did.

It lasted for a couple of mins. I went outside and saw a neighbour who was out walking her dog, and she was as stunned as I was.

Have there been any more reports made? Sat 1st Aug 2009. New Mills in the High Peak Derbyshire.

Thank You

hello

my name is **Section 40** i live at

Section 40 mitcham junction surrey **Section 40**

last night when walking my dog i saw 4 strange orange lights in the sky following each other .

after watching them the lights disappeared not from view but just disappeared

saw them again soon after starting their path across the night sky again from the same starting point

came inside and looked out of my window and saw these same lights in a 3 prong triangle formation

i took a video but it is too large to upload anywhere

is there some other way of sending this video to either ourselves or the news channels if they want it???

yours honestly

Subject: Strange sighting 4/8/09

Hi

My family and I were all sitting in the garden in Brighton at about 10-10:30pm last night and we saw and orange light rising from the south east - it looked like the tail from a rocket launch like when the shuttle goes up. The object moved to the north before disappearing behind clouds. This happened three times over a period of 30 mins or so and a few seconds after the third there was a bright flash in the sky to the north of us. The object was too far away to identify even with binoculars but looked triangular and bright orange.

Subject: UFO sighting over South London

Date: 2nd August 2009

Time: approx 00:22hrs BST

Location viewed from: **Section 40** Shirley, Croydon, looking south)

Duration: about 60 seconds

Shape: unknown - just a point of light visible in the sky

Colour: orange/fire; no haze or trail/smoke visible around the object; flickering slightly so at first we thought this might be an aircraft on fire

Sound: no sound at all - and we were in a quiet environment with only distant traffic noise

Movement: the object moved from West to East at approximately the same speed as a civilian jet aircraft but

since there was no aircraft sound, and there were no flashing/navigation lights, we concluded that this was not an aircraft. (We are accustomed to seeing aircraft in this vicinity as we are located on a loop of the flightpath into Heathrow, but this was at a time of night when such flights have normally stopped)

Altitude: difficult to estimate but it appeared to be just below the cloud base. There were no other airborne objects visible in the vicinity

We were not under the influence of alcohol, smoke or medication/drugs

We were not in possession of any equipment to photograph the object

We have not witnessed or reported a UFO sighting before, but decided to report this because we could not explain it.

Regards

Our Ref: UFO Report

30 July 2009

Dear Sir

I am writing with reference to your report of 'unidentified flying objects', seen on 24 July 2009 over Edinburgh, details of which you emailed to the Department. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives, solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

I am sorry I could not be more helpful.

Yours sincerely

UFO SIGHTING ON FRIDAY, 24TH JULY 2009 - EDINBURGH NORTH=2 0- SIGHTING ABOVE SKY - PARAMETER FROM EASTER ROAD TO PILRIG PARK

At 11.00pm on friday, 24th july 2009 i was watching television and got disturbed by flashing light from the sky. i went to look out my window, and saw it was very cloudy, through the clouds there were pale blue lights, odd shapes, but mostly circles, which were sporadically moving very fast around the sky, they had lines of blue/white strobe light, their movement was unusual as it was very fast and sporadic, jumpy in fact, not normal. This went on spradic movements for 25 minutes, a red light was on outside of parameter of the blue lights, the red light was smaller than blue lights. The blue lights then dissapeared then a very large blue light, size of moon was still for around 20 minutes, smaller ones dissapeared. It was like the blue ones had amalgamated into one large blue one. All of a sudden the large blue one moved speedily from one position to another, then speedily dissapeared.

These UFO's were most unusual! I called my friend after smaller blue lights dissapeared, she also saw large blue one, and also saw large blue one dissapeared

Sorry to sound really nuts but last night me my father and my girlfriend saw about 7 bright orange coloured lights all in a straight line and only 2 in view at any time then when the last 2 came over what i can only explain as a moon as big in the sky and same colour flew across at double the speed the orange lights were going the white moon ball thing really spooked us and none of them made a noise they were too high to be helicopters and definatly were not planes as the bright orange light was the same all the way round the thing. this was around 11.30 pm last night. about half an hour later i was looking into the sky and saw 6 white balls in a triangle formation travelling very fast with no noise again i shouted to my dad and he saw them to. i did not believe in ufos until last night can you please shed some light on this. we live in armthorpe doncaster.

To: Air CmdSecCS-UFO Desk1

Can't believe I am writing this, but also cannot believe what I and a friend saw on the night of Friday, 3 July 2009.

Probably all quite innocent, but seemed unnatural to us.

I was driving from Cawood towards Stillingfleet around 11.15pm on a very clear night with a friend. In the distance were two very bright orange lights and my first thoughts were they were beacons on masts. However, I was unable to think of any masts in the area and they both appeared to come closer. At this point my friend commented and I said that I had seen them also. They seemed to get closer and closer and then just hung in the sky. Didn't move up, didn't move down and didn't move from side to side, just sat there. At this stage we pulled over to watch them as my second thought was that they were helicopters, although once pulled over and the engine turned off, there was not sound they did not move.

Two other cars also pulled over behind us.

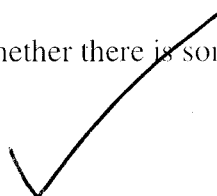

After about five minutes a second bright orange light surrounded by a red glow moved from the left towards the two orange lights. The orange lights then just disappeared as if switched off like a light. We could not see them anywhere.

The third light then hung in the sky also - not moving in any direction whatsoever. After about another five minutes, that just disappeared in the same way.

Weird, but it would be great to hear if possibility of UFO or whether there is some other explanation.

Many thanks

Subject: UFO Sighting - Brighton, E.Sussex

Hi,

On 26th July 2009 at approx. 21.30 hrs I saw a ufo. I saw a bright orange light with a glow out of the window so took a further look with my friend. It was much bigger than a plane light and obviously much closer to the ground. It was very bright indeed and travelling inland from Brighton Centre. We went outside into the garden and it passed over our house and carried on until it disappeared. It was travelling in a straight line, in a North East direction, towards London I would say. It moved very fast, about the speed of a plane or faster. There was no tail, it was simply a round bright orange light. It was too fast and bright to be a lantern of sort, it move in a straight line and fast despite it being a very still night. It made no sound at all.

I am not a believer in extraterrestrial activity, however I have never seen anything like this before and can't conclude what it could have been.

I don't know how your investigations are carried out (obviously!), but I would love it if you were able to enlighten me. Either way, I thought best to report this!

Kind Regards,

Subject: An unexplained event

Dear Sirs

I am a bit embarrassed about reporting this, but at about 9.30 last night, whilst in my garden in Bromley Kent, I saw an object, travelling from South to North, which was really unusual. It made no noise at all, was travelling at a constant speed and appeared to be an orange/yellow colour, with the shape similar to a hot air balloon. It could not have been a balloon as it was travelling too quickly. It was definitely not an aircraft, or a helicopter, both of which overfly my property on a regular basis so I am used to their sound and visual identifications.

It was not a shooting star, which I am used to seeing on other continents, so was a complete mystery to me. I have never seen anything like it before. And I don't believe in alien spacecraft.

Yours

Our Ref: UFO Report

30 July 2009

Dear Section 40

I am writing with reference to your report of 'unidentified flying objects', seen on 26 July 2009 over Hoddesdon, details of which you emailed to the Department. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives, solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

I am sorry I could not be more helpful.

Yours sincerely

From: **Section 40**
Sent: 29 July 2009 10:31
To: Air CmdSecCS-UFO Desk1
Subject: Sighting - 26 July 2009 00:20am

I saw 3 orange objects, the first 40 minutes after this sighting, from my house in Hoddesdon. I was looking North and saw an orange glowing object that was travelling slowly from the SW towards the NE. There was no sound, no flashing lights and no variation in the lights intensity. It was at an angle to the ground of about 30-40degrees which was just over roof top height and the size was equivalent to holding a pea at arms length. Even squinting at the object I couldn't define it's shape, it seemed to glow. It took about 4-5 minutes to travel across the sky, slowly getting smaller and fainter and then not visible at all. It is very difficult to estimate altitude or size but thinking of the speed and the time it took to gradually fade in the distance I would say that it was very high. This was not a plane or a planet, both of which I am familiar with.

20 minutes after this sighting there followed an exact repeat and again 20 minutes after that. I keep thinking that perhaps I saw a satellite reflecting the sun's rays but what satellite orbits in 20 minutes? or, were there 3 satellites on the same orbit?

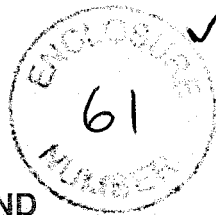

I am 55, lived in this house for 30 years and have never seen anything like this before

Our Ref: UFO Report

29 July 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 24 July 2009 over Barking, details of which were passed to us by the Metropolitan Police. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs. I apologise for not using your full name but these details were not passed to us.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Barking for 24 July 2009.

I am sorry I could not be more helpful.

Yours sincerely

From: Section 40

Sent: 27 July 2009 15:10

To: Air CmdSecCS-UFO Desk1

Subject: U.F.O

On Wednesday 15th July, 09, I was walking my dog about 10:40pm.

There was some high cloud and some stars visible.

I saw a round white object, very bright, but not casting a beam of light.

I do not mean round as in ball, I mean I saw the underside if the object, which was round.

I observed the object for up to two minutes.

It was rising vertically. The higher it went, the smaller it became, until it appeared to be the size of a star.

There was no sound coming from the object.

To compare the size, I would say, if a star was a pin head, what I saw was a pound coin, until it too became a pin head. (as it ascended.)

I neither drink nor take drugs and I am in my late fifties.

You can e-mail me if I can be of further help.

 Subject: Re: 20090728-UFO Report (Section 40) Littleborough-U

Dear (Section 40)

Many thanks for taking the time to respond to my e-mail, I fully appreciate your detailed explanation and procedures. I should imagine you get many reports of various sightings that can have a rational explanation for them and I suspect that it would take forever to investigate them all.

However, as I stated in my initial e-mail that I have been a Fixed Wing Pilot PPL CPL training for a total of five years, what I witnessed was not any recognizable Aircraft as I observed through a pair of binoculars as well with the naked eye, it didn't have any Navigation Lights no Anti-Collision and no Red beacon light and certainly no engine sound.

It was very close if not under Manchester Airport's TMA. It certainly came from that direction, As well sending an e-mail to you I also sent one to another organisation who again gave a very similar response as regards to investigated these issues.

From the description I gave of the object they said it very likely to be a Chinese Sky Lantern and they were a little bit of a menace and causing many reports of UFO sightings, I did initially agree with what they said and the explanation was very reasonable, but it was moving against the wind not with it.

So I don't really think I will ever find out what it was, but again I'm sure I wasn't the only one to have seen it as it was just below the cloud base.

Again many thanks for taking the time to reply to my e-mail.

Thanks

From: Section 40
Sent: 20 July 2009 10:58
To: Air CmdSecCS-UFO Desk1
Subject: UFO Sighting Saturday 18th July 2009

To Whom it may concern,

On Saturday 18th July at Exactly 22:23hrs, In Littleborough Lancashire I witnessed an Orb like shape in the Sky at approximately 120Degs from North Reference, It was Orange in appearance and moved in an North East direction and was clearly visible for at least 10mins.

I also viewed the object through a pair of Binoculars to try and get a clearer image, As I've been a Fixed Wing Pilot for over five years i noticed NO Navigation Lights at all No Strobes and there was certainly No engine sounds either, It moved on a constant bearing very slowly.

I also have an interest in Astronomy and I'm 100% certain that this was No Space Debris or the Space Shuttle / International Space Station as the object was under the cloud base at the time.

The only explanationon i could give that it may have been Ball-Lighting but there was no thunder storm activity at all that night.

I would be very interested to here if anybodyby else had seen the object, I can guarantee that what i have stated is 100% true and that it was NO Known type of Aircraft as again i have been a Pilot PPL/CPL for 5 years and i know of every type of Light's that Aircraft need to display.

My Full details are as follows :

Subject: Release-Authorised: 20090723-UFO Report Section 40 Trimley St Mary-U

Dear Section 40

I am writing with reference to your e-mailed report of an 'unidentified flying object', seen on 15 July 2009 near Trimley St Mary. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Trimley St Mary for 15 July 2009.

I am sorry I could not be more helpful.

Subject: Dancing Lights

Hi,

Over the past two weeks the same event has been witnessed by myself and my girlfriend twice, and a third person on a completely independent occasion.

Last night (15/07/09) at around about 23.30, I myself and my girlfriend noticed what seemed to be a very bright white light, almost like a large Star, appearing to move slowly in the sky, north-West of Trimley St Mary, Suffolk, above the river Orwell.

The Light to move south, doubled back on itself in a smooth motion to its original position in sky, at which point a similar light suddenly appeared with it.

The two lights almost "danced" around each other, each making out one equal half of a circle, before splitting off in completely opposite directions. The original light quickly veered towards our position, whilst the newer light moved off at speed towards the north west, away from us.

At this point it became apparent that the lights were either moving at speed or were much lower in the air than first appeared.

The Light cruised above us, and I noticed that unlike most aircraft there was only this single bright white light, no repeating flashes, or different coloured lights usually seen.

(There were at least 3 other conventional aircraft in the sky at the time with which to compare the object) A vague black outline could be made out surrounding the light against the night sky, however this may have just been wishful thinking from my eyes, trying to imagine the shape.

As I commented, there were other aircraft in the sky, and a vague drone could be heard from the one closest to us, however the "Light" made absolutely no noise whatsoever. Also in comparisons with the other aircraft, this Light was clearly closer to us than expected.

As the Light reached almost immediately overhead, it disappeared instantaneously. At that point in time, there was very little cloud cover and the Stars could be seen clearly, so I ruled out the disruption of cloud cover. The previously bright white light, simply disappeared before us.

Usually I would have put something such as this down to perhaps just a normal aircraft, a Chinese lantern or just an odd experience.

However, as I mentioned, this is the second time in two weeks both myself and my girlfriend have witnessed the exact same sequence of events, over the same time scale. Last time I had just brushed the sighting off as "odd".

We arrived at my girlfriend's house, and began to tell her mum of what we've just seen. At which point she interrupted, stating that she had seen the exact same thing, with incredibly similar movements the previous week. Describing the "dance" as if she had seen through my own eyes. She was unaware of what we had seen, and vice versa.

The only objects that I can think resembles the light most simply, by way of an explanation, are Chinese

lanterns. But this wouldn't explain the "dance", or the fact the two moved off in opposite directions. (Particularly the one above us, moving against the wind). The lights were just far too bright to be lanterns in my opinion, and acted and looked so unlike conventional aircraft that I cannot think of an explanation.

Yours Sincerely,

To: Air CmdSecCS-UFO Desk1
Subject: UFO sighting

Hi there,

I can't believe I'm actually doing this, but I'd like to report a UFO sighting over Newport, South Wales.

Time of the sighting was 1.22am, July 19th 2009.

The object was moving west to east over the centre of Newport. The weather was patchy cloud with light rain.

The object was a bright, reddish light travelling west to east, below cloud level. It did NOT have the usual aircraft lights or flashing lights and did NOT make a sound. I am guessing that cloud level was perhaps 3000ft (mountains in the area are around 1,300ft).

I have had a keen interest in aviation since a child and know what conventional aeroplanes and helicopters look and sound like, so I know it was neither of these in any form that I am aware of. I also know what the International Space Station, meteorites etc look like. It was below cloud level, so was not an object in near Earth orbit. It was moving too slow to be a meteorite.

The object travelled in a straight line. It's brightness did not alter during its approach, or as it was receding. When it eventually reached a patch of cloudless sky, it faded. The fade lasted perhaps 10 seconds until it disappeared.

In all respects, this object travelled in the same way that a normal aircraft would, but it lacked all the give-away signs of night-time lights (coloured wing/tail lights, flashing lights of a helicopter). The fact that it was reasonably low yet emitted absolutely no noise was what fascinated me and alerted me.

Again I would like to stress that I have an above average knowledge of aircraft and have always been a keen sky watcher with an interest in astronomy. This object was not a normal aircraft, orbiting satellite or inbound such as a meteorite. I can make no guess as to what it is.

I don't subscribe to ideas of aliens visiting the planet because I don't believe that it is possible to cross the vast distances of space.

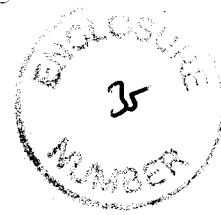

I was able to get some footage on my mobile phone (Sony Ericsson Cybershot) of the last 42 seconds of its flight, which I will be uploading to YouTube.

I can be contacted on this email address for any further information.

About me. I am a 46 year old Public Relations consultant. I was walking my dog when I saw the object.

Best regards

Subject: Dursley, Gloucestershire 18th July 2009, 22.35h (UFO / Possible Plane Crash?)

Dursley, Gloucestershire 18th July 2009, 22.35h

Driving back from Stroud to Dursley in my car, my six year old son pointed out what we first thought was a police helicopter hovering somewhere over the river Severn. At first I thought it was odd - as it wasn't the typical white / blue colour lamp that they use, more of a orangy red.

I pulled the car over so we could watch for a bit. It continued to hover and slightly move towards the direction of Stroud. Suddenly it dropped directly downward, very very fast and unfortunately disappeared behind the hill. There was no gradual acceleration down- It just dropped down very quickly.

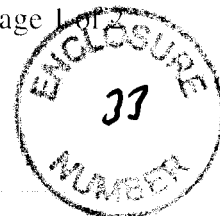

I don't know if it was a helicopter or plane... if so, the wreckage will be between Cam and Berkley.

I have not seen the orange light since it disappeared.

Several nights this week ive been alerted to a noise while iv been in bed.. a noise like a lorry/motorbike/jet.

For example last night i witnessed some kind of aircraft circling the sky. In one quarter the lights on this air craft are white. another quarter green/blue, and the other red.. then it circles again flashing red. on this occasion it was 3am and people were even in the street watching and pointing. The aircraft flew right over my house i could see that it wasnt shaped conventionally. shaped like.. well to only what i can describe as a missile. with two lights.. a bright white one directly on the rear end and a blue/green one slightly further up from it.. This aircraft was clearly metallic as i could see light reflection. This aircraft did not have wings. and was not moving conventionally, for what i can only describe, not moving in a straight line, but diagonally. last sighting - 02:35 18/07/09.

Subject: Release-Authorised: 20090720-UFO Report Section 40 Bedford-U

Dear Section 40

I am writing with reference to your photograph of an 'unidentified flying object', seen on 5 July 2009 over Bedford. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Bedford for 5 July 2009.

I am sorry I could not be more helpful.

Subject: Strange object above Bedford
Attachments: DSCF1261.JPG

Attached is a Photo taken on Sunday 5th July 09 at 14:32.

Taken at Bedford Park looking south towards the Pavillion there is a strange looking object above the Pavillion.

It was a fairly sunny clear warm day, I have other photos taken before and after this shot and nothing is there or on the lens.

It was not noticed at the time of taking the shot, but both my daughter and I noticed it immediately we transferred them to the PC when we got in.

Nick Pope formerly of the M O D recommended I sent this to you as he no longer has resources to investigate anymore.

Thankyou,

Dear Sir or Madam

I would like to report a sighting of a ufo in Westonbirt near Tetbury. It was a rather large ball of light about the size of small car and around 26 meters above the ground. it was pulsating ever 5/8 seconds but soon shot off. we tried to follow it but it had disapered by the time we turned our car around. I'm 100% sure that this was no plane or aircraft which i have seen before. Most people have been quick to say that its a Chinese Lantern, but i've seen them before and the size of the thing would not have been a lantern, plus i'm sure they don't speed off with little wind force. There where no homes for a long drive after that.

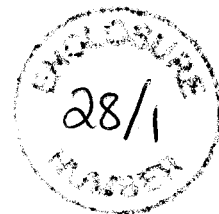

we were in the middle of no where and it was around 22.00 Friday the 17/07/09

If you wish to contact me then just email.

Kind Regards

Subject: LARGE SILVER WHITE BALL (ufo?). West Sussex. 13 July 2009.

Hello,

I write to inform you of a second sighting remarkably similar to my first (which was 29th May 2009). This has really quite unnerved me. I never expected to see this thing again ('lightning never strikes twice' I thought), let alone see a UFO in first place! I am a mixture of spooked and curious to get to bottom of whatever this thing is.

Anyway, here's my report/sighting below:

ANOTHER LARGE SILVER WHITE BALL.
Worthing, West Sussex, UK
23.01 Monday 13th July 2009

Am feeling very spooked, as have just seen an object almost identical to the one I witnessed (and reported) on 29th May in nearby location.

Was outside before turning in for night, and as usual glanced up to see if any stars visible.

Almost clear night and plenty of stars, when I noticed from corner of eye, a large and incredibly bright silver/white ball/sphere, constantly lit, slowly moving directly from West to East direction, heading away from my location.

This object was higher than the two planes which were also visible - one of which was flying from London towards South/South East coast at the time, and one returning to UK which was just above the coast flying Northwards.

This object was much larger than the aircraft and the brightness of the light was many times more intense and bright compared to aeroplane lights. Am sure at least one of the Pilots/Crew of those planes MUST have seen this thing?).

It was very similar to my earlier sighting in May, except this object was slightly smaller than the last (though still much larger than any star!), it did not suddenly increase in size this time, and wasn't changing direction like the previous time.

However, it was remarkably similar in several ways: intensely bright silvery white, clearly ball shaped, and much larger than any visible stars or planets.

Also, it didn't change direction (as previous sighting had), but instead it did appear to "stop" still several times as it went into the distance and, what was most remarkable, was that it appeared to dim in brightness and shrink in size slightly whenever it stopped still, even though its brightness did not diminish the further away it flew when it was moving.

It did not seem to dip towards horizon as flying objects would (heading into distance away from you) but instead seemed to keep at constant altitude in spite of increasing distance. Then after approx 9 minutes, this thing just vanished. Disappeared with no fading or decrease in size/brightness.

Possibly sounds crazy, but this is now the second time I have seen these things. In similar area and behaving in similar manner.

Am not at all frightened by the idea of life beyond Earth, yet am also a rational, down to earth person, however I actually felt quite scared when I saw this tonight, the hair on back of my neck went up.

What is frustrating is that all the countless times my partner looks at the night sky with me, these two sightings have both happened when I've been outside alone at night, which is quite annoying and rather unnerving. And again, it happened when I didn't have my camera to hand (am kicking myself about that.. but to be honest, was once again transfixed by this thing and couldn't take my eyes off it, so probably wouldn't have thought to get a picture anyway.).

As before, I have checked all the relevant authoritative sites to ensure this could not have been a passing satellite or ISS or Comet (using HEAVENS ABOVE and SPACEWEATHER websites) and come up with nothing to identify it. There was nothing passing this area at that time/date, in that direction.

And it certainly wasn't any plane or helicopter, nor a balloon or anything like that. This was a large solid looking object, with incredible brightness.

I really just hope others have seen this thing too and are brave enough to report it. I'm certain some Pilots/Aviation people must have seen this thing!

Subject: Information needed

Dear Sir/ Madam;

I hope that this email doesn't sound ridiculous but I can assure you that it is absolutely serious, and I would be very much obliged if you could help me with my request.

I wish to make a confidential report to an appropriate person or body in the MoD or the RAF about some very strange sightings in the sky over the Shropshire-Welsh border that my wife and I have both recently experienced. After the first time this happened (the 18th April, 2009) I reported the matter by telephone to the Police and thought nothing more about it, until late last night (Sunday 12th July) when a very similar event occurred. This time I think it appropriate to report these matters to a higher authority for their own information and assessment.

My name is Section 40 and my home telephone number is Section 40 and my home address is Section 40 Oswestry, Shropshire, Section 40

In such unusual circumstances it is extremely difficult to find an appropriate person or body to report these matters to, and I would be most grateful for anything that you can do to help me. Please feel free to forward this email as appropriate.

Many thanks for your time and trouble.

Yours sincerely,

Subject: UFO sighting/report

Dear Sir/s,

Between the dates of 29th June 2009 and 2nd July 2009, I witnessed several orb-like lights in the sky during broad daylight in Harlow, Essex.

The first and most blatant sighting was a bright orb that travelled in a straight line as a green-coloured helicopter approached it at high speed. Altitude was approx 600-1000 ft and approx the same distance away as it hovered over St James' School on Parringdon Road. As the chopper got closer and passed the orb, it slowed down and suddenly vanished and dissappeared. The helicopter then made some erratic movements as if it were shocked by the orbs dissappearance and started circling the field I was in. I do not have an exact time/date for this sighting but it was between the dates outlined above and at approx 4pm. On this day I also witnessed several other orb-like objects faintly flying through the skies, dissapearing then suddenly reappearing later on it's apparent course. The main orb that I saw was about half the size of the helicopter and was definitely not a plane, bird, jet, swamp gas, weather balloon or any other phenomena im aware of.

As this is an 'Unidentified' flying object I thought it should be reported. Im not sure if you have any reports from the helicopter pilot who possibly saw this also, but I know what I saw and natural phenomena or not, it was a beautiful but strange sight that deemed worthy of a report to the DoD.

Regards,

From: **Section 40**
Sent: 13 July 2009 11:00
To: Air CmdSecCS-UFO Desk1
Subject: sighting,swindon

Dear Sir/Madam,

Thought I should report what I saw on 27th June of this year. I live in West Swindon, only a few miles from RAF Lyneham, Wiltshire. I was travelling at about 22:45 on that evening on a regular route of ours and noticed an orange light in the sky coming over Greendown school. My initial reaction was that it's going the wrong way - we are in a flight path of the air-craft flying into Lyneham, so it's nothing new to see something in the sky. But as I say it was going in the opposite direction to normal, so it caught my attention.

As I was sat at the junction waiting to turn right into Grange Park Way I noticed two more (although they were quite close together), again nothing really unusual in that, as there are often 3 aircraft in a flight path going into Lyneham flying at a safe distance from each other. But as I drove (trying to keep an eye on the lights as well!), turned left into Hay Lane, lost sight of them momentarily and when I saw them again (near to the rear entrance of Lydiard Park) there was now approximately 12/13. I proceeded to pull over, as did a car about 200 yards behind me, the lights travelled right in front of me from my left to right. The lights formation was kind of a mis-shapened diamond at the front and the others looked like a tail following behind.

I did try to photograph them, but I only had my phone and when I reviewed it - the photo was just black. There are trees lining the road and when I pulled forward to get a better view (as they were disappearing behind them) they had completely gone, all of them.

I do wear glasses for distance, although I did not have them on, so I cannot describe any sort of shape to the individual orange lights. But there is no mistaking what I saw.

I hope you find this information useful, and I have not reported this easily (ridicule and all that), but as I have said previously, we do live near a military air base, so I thought I should.

With Regards,

Our Ref:
UFO Report

14 July 2009

Dear

Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 14 July 2009 over London W1, details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from London W1 for 14 July 2009.

I am sorry I could not be more helpful.

Yours sincerely

To whom it may concern,

Report of Unidentified Flying Object

Below is information of which we received via telephone, reporting an unidentified flying object.

- A Date, Time and Duration of Sighting**
Date: 4th July 2009
Time: Approximately 2300 local
Duration: Approximately 30 – 40 seconds
- B Description of Object**
Number of objects: One
Size and Shape: Unable to specify
Colour: Yellowy/Orange Light
Brightness: Single bright light
Sound: No sounds was heard
Smell: Nothing was smelt
Other: Observer reported not seeing any strobe or navigation lights.
- C Exact Position of Observer**
Position: Centre of Teignmouth, Devon
Other: Observer was outdoors and stationary at the moment of observation.
- D How Observed**
Observed through the naked eye.
- E Direction in which Object was First Seen**
Observer first reported the object coming from the South East and then heading towards the North West towards the Haldon Hill area.
- F Angular Elevation of Object**
Observer estimates approximately 50° of angular elevation.
Observer also estimates that the object was at approximately 2000ft and travelling at 200kts.
- G Distance of Object from Observer**
Observer estimates at 2000ft directly overhead.

H Movements of Object

Observer reports the object travelled in a straight line with possibly a slight curve.

J Meteorological Conditions During Observation

Observer reports a clear night with a bit of high cloud.

Exeter Air Traffic closed at 2038Z. However here were the met conditions at Exeter at 2020Z.

METAR 042020Z 17004KT 9999 FEW025 SCT035 18/14 Q1011

K Nearby Objects

Observer was in a built-up area. He reports various buildings, but nothing else specified.

L To Whom Reported

Observer attempted to phone Exeter ATC just after the observation, however we had closed at this point. The observer reported the incident again at approximately 0900Z direct to Exeter ATC.

No other agencies were contacted.

M Name and Address of Informant

Section 40

Teignmouth

Section 40

N Any Background Information on the Informant that may be Volunteered

The observer has not previously has any sightings of unidentified flying objects.

He claims he was not intoxicated at the time of observation.

He also says he does some light aviation.

O Other Witnesses

The observer's daughter and grand-daughter also saw the object.

P Date and Time of Receipt of Report

Approximately 0900Z on the 5th July 2009

Other

D&D were contacted immediately after the report was received as per MATS Part 1 Para 3.3, Section 6, Chapter 5, Page 2. They supplied the number for the MoD UFO reports service and a message was left on that number.

Should you need to contact Exeter ATC please call us on Section 40

UFO Report

9 July 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 4 July 2009 over Marston Green, details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Birmingham for 4 July 2009.

I am sorry I could not be more helpful.

Subject: Release-Authorised: 20090709-UFO Report **Section 40** Stratford Upon Avon-U

Dear **Section 40**

I am writing with reference to your e-mailed report of an 'unidentified flying object', seen on 5 July 2009 over Stratford upon Avon. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, you might like to know that we received a report of a round orange light near the village of Bideford on Avon at around 22:30 hours on 4 July, but we have no other details.

I am sorry I could not be more helpful.

Air CmdSecCS-RAFBUSec13 **Section 40**

From: **Section 40**
Sent: 06 July 2009 03:46
To: Air CmdSecCS-UFO Desk1
Subject: Report of sighting on 05/07/09

Hey there MOD, I was unsure whether I could fill out an application online about a UFO sighting in the midlands, so instead I compiled a report, it's a bit lengthy, but hopefully interesting none the less :P, the sighting certainly was to me and my mates when we saw it.

Where: Stratford upon Avon, Warwickshire, England. Near the Welcombe Hills, around the golf course area and opposite the end of Blackthorn Road.

When: Approximately 01:35am. I started voice recording at 1:52am and finished recording at around 02:24am.

Date: 05/07/09

Who were the witnesses: There were 4 of us (all 17 years of age), when the object was first noticed, but then 1 had to go home before I started voice recording, so there were 3 of us which fully witnessed the object.

Weather Conditions: A relatively warm/mild night, with a few high clouds in the sky, but mostly clear.

Details of object before voice recording: A dormant blue light was first spotted by me, and I initially assumed it to be a plane, it then proceeded to travel in a rightwards direction, (the colour of the object changed to green, with a red light at the opposite end of its moving direction, possibly representing a thruster) and I pointed it out to my friends. We were still not too suspicious and still interpreted the object to be a steadily moving plane, that was until it suddenly stopped, hung for a couple of seconds, changing to a blue colour again, then started moving in a leftwards direction, and changing to a green colour with a red light at the right hand side of the object. Now to my knowledge we do not possess the technology to make an aircraft move in such a radical manner, the only rational explanation to what we witnessed at this moment was it to be a helicopter, but the issue with this was the fact that the object seemed to be producing no noise whatsoever. The object then continued to move from left to right with some considerable speed, until resting over the top of a cluster of trees and changing to a blue colour again. After a few seconds the object started to move towards us and stopped above some close trees, and

began to move downwards, changing completely red with a flashing red light on the top of it, and this is where it got increasingly strange, we could see the object's light reflecting off the top of the thick tree leaves, so clearly the object was right above the tree, showing that it was not of considerable size. It then turned white and went behind the tree, we could still see its light shining through the leaves, and it stopped moving. After being inactive for about 10 seconds the object went up above the tree again, changing to a green colour, with a red light at the bottom, before moving over towards the golf course. Disturbingly, the object then stopped in the air, and shone a bright white light down over the golf course and erratically scanned the surrounding area, we could easily see the whole light beam, and the light appeared to emit from the body of the craft, which darkened to a dark blue colour when the light came on, the object also had two red lights on its left and right side. After scanning the area, the object went red and flew up into the air, changed to a green colour, with the according red lights to whichever way it was moving, and started darting around the sky above the golf course. At this point I withdrew my phone, an LG GD900, and attempted to record the object, but unfortunately it wasn't at all picked up on the camera, even though it was a rather bright object. The object then went dormant in the same point it had been resting in previously, just next to a tall obstruction of trees. Soon after, the object came out of this position and proceeded to travel over (it was green in light with a red light to the right of it) to the main congregation of trees at the Welcombe Hills, and scanned its primary light over them before then turning round and retreating back to its seemingly favourite dormant position. This is when I decide to use my phones voice recorder instead, so we could document what we were seeing and also, if the object came over to us, or made a loud noise, we could pick the sound up.

Details of object whilst and after voice recording: The object was still lying dormant in the air, and me and my friend start discussing what the object could look like, shortly after this the object moves to the left then begins hovering. Whilst it is hovering I spot a plane in the distance heading towards the direction of the object, it looked like a standard commercial airliner and was moving at the speed you would expect one to move at. The object, probably currently unaware of the plane then suddenly turns entirely red, with a flashing light on top, and starts going down behind the trees, possibly to land? After a minute or so we spot more red flashes behind the trees it settled behind, and we document that we have been watching the object for 20 minutes now, which would mean we spotted the object at around 1:35am. During this time, the airliner had been getting closer to the objects location, and upon notice of it, the object flew out from behind the trees, being red in colour, and darted off behind the distant clouds in the sky, a light is then seen coming down from the clouds towards the plane, this light goes off and the object disappears. It then remains here until plane has gone and moves to a visible location and goes dormant (blue in colour) again. An idea of how high the object must have gone could be taken upon the fact that the airliner was flying underneath the clouds, and still looked relatively high up, several thousand feet, whereas the object had in a few seconds managed to move from ground level to above the highest clouds in the sky, which the plane had passed under. A while later, the object emerged from behind the main congregation of trees, and was green in colour, it then stopped at a location it had been hovering over a lot, and went dormant (blue in colour), a faint, white light beam could then be seen shining downwards from the object, and two lights could be seen orbiting the object, one was green in colour, and the other one was red, as well as this, the object also looked to have a hazy dark blue force field or aura around it. A while later the object then turned white in colour and began to move downwards, but then suddenly started moving very quickly in a leftwards direction, it changed red when moving in this way, whilst it is doing so we attempt to decipher what

Each of the lights mean on the object: Green = Movement, Red = Throttle, Blue = Dormant and White = Scanning light. The object then changed to a white colour and shined its main light over the ground beneath it, after doing so; it then turned around and headed the other way, back behind some thick trees. In an erratic and jittering movement pattern, the object appeared from behind the tree then proceeded in a downwards movement, back behind the trees again, possibly to land. Shortly after this we hear a scratching noise behind us in the long grass along with a high pitched squealing noise, we are initially worried about the noise but then dismiss it as a badger, then abruptly, all three of us started to feel really cold, like it was the middle of winter, even though it was a fairly warm night. Could it have been something sinister behind us in the grass, seen as though at this point the object was possibly grounded behind some nearby trees? The clouds which were above the tree which the object landed at then started to move upwards, and the most southern cloud had a rather prominent glow to the bottom of it, suddenly we then spotted the object very high up in the sky, so it must have either moved very quickly or teleported, because we were watching the area almost constantly the entire time. That is of course, if there wasn't a second one in the sky, and the previous one was still grounded. From here the object moved left and we heard a loud rustling in the bushes behind us, and spotted something white in the field, it could have just been our imaginations running away with us, but we decided to move anyway. After proceeding halfway towards the entrance of the field, we spotted the object move incredibly fast to behind the clouds, and the atmosphere as well as the air in the field got increasingly cold for all three of us, and the breeze felt almost icy, which was odd as neither of us were shivering. I then got a little worried and we left the field and wandered out into a residential area, the object is still hanging in the sky at this time. We then decided to walk home and after having a conversation, we looked between some houses and spotted the object lying dormant and blue in the sky, this is then when I stop recording as the object seemed to be doing nothing else. Shortly after the recording the object disappeared off behind the clouds and we went home. What a night! :).

P.S. I do still possess the voice recording.

Subject: strange sighting

Hi my name is Section 40 and I live not far from Sheffield approx 10 miles south of the centre. I was out with the dog and at 10.45 pm I saw six bright orange /red lights in the sky, all in formation , they seemed to be getting higher almost if they were hot air balloons, the first light disappeared upwards and then the second etc, after looking closely I could make out a sphere like a balloon following to the side and then another appeared , it was all very silent.

It would be interesting if anyone else has witnessed these?

Or do you have an explanation ?

Kind regards

Subject: **Section 40** Hayes. Middlesex. **Section 40**

I witnessed something flying over my house, It was something quite far up, so could have been witnessed by someone living in a different area.

This was last night, early morning of the 30/06/09 at approx between 2:41 until 2:43 am. I spotted which seemed a roundish glowing shape, flying at a steady speed and with no noise. I was having a cigarette outside, which I do quite regularly. The skies were clear and you could see the stars. Could it had been a satellite, glowing against the moon.

I defiantly was surprised and have filmed it for a few seconds until the camera stopped picking up the object. Also hopefully not related to the incident, my electric power just to my sockets went off around 10 minutes after wards and I am still unable to find out why (it has not tripped, so there has not been a short circuit) weird.

I would like to know, if there was anything flying around about that time very high up. I could have been a plane and the moon was shinning off it and just made it look a funny shape. But with no noise.

Hope to hear from you soon

COVERING

Station: Chelmsford

Officer: PC [Section 40]

Subject: Unexplained Aerial Object

Date: 21/06/2009

Ref: Incident 1538 of 20/06/2009

On 20th June 2009 at 2223 hours [Section 40] from [Section 40] Chelmsford [Section 40] [Section 40] led Essex Police stating that she had seen an unidentified flying object near to her house. In compliance with policy, I have recorded the details.

Date, time, duration: 20th June 2009 at 2200 for about 5 minutes

Description: 2 objects, about the size of light aircraft but perfectly spherical and glowing bright orange. Solid and made no noise

Exact position of observer: Outside, Stationary

How observed: Naked eye and filmed using mobile phone

Direction in which objects first seen: Coming from north west of Chelmsford to south east

Angle of sight: 30

Distance: From house about 1/4 mile

Movements: Constant speed, same height and same distance apart

Met. Conditions: Clear sky

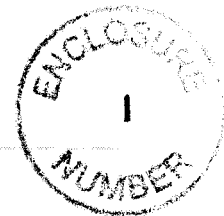

Nearby objects: Trees and houses below

To whom reported: Police

Subject: Release-Authorised: 20090703-UFO Report [Section 40]

Dear [Section 40]

I am writing with reference to your e-mailed report of an 'unidentified flying object', seen on 2 July 2009 over Blackwood. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Gwent for 2 July 2009.

I am sorry I could not be more helpful.

To: Air CmdSecCS-UFO Desk1

Just to report a recent sighting, on the 2nd of July at 10.20pm I was checking to see if my vehicle was locked and noticed a large bright orange light through the tree line 500 m south of my property. (as I live in a rural agricultural area there is no town lights or lighting around the property I was to say the least quite curious)

The light omitted by the object was a constant orange, it seemed to turn about and clear the tree line the other side seemed like a large rectangle shape that was fire red /orange, at one point I was convinced it was on fire? There was no noise, it seemed large, The object slowly started to clime and move slowly to the south in the direction of Gloucester

I called by 13-year-old son to come and see, as it was very unusual. It moved away from us at a steep angle until it become obscure after 5 minutes or so

As an ex test Engineer for Hawker Siddley I can evaluate and dismiss 99% of what people think of as unusual sightings. but not this one.
